The BLM State Office went on a field trip to Wyoming and visited some surface mines in anticipation of doing the NEPA for the Alton coal leases (located by Kanab). The BLM state office was educating the BLM Kanab Field Office (who will prepare the NEPA document) about surface coal mining and reclamation.

I thought that you may want to see these photos... fyi.

(See attached file: ColoWyo reclamation 6.JPG)(See attached file: ColoWyo reclamation 7.JPG)(See attached file: ColoWyo reclamation & pit.JPG)(See attached file: ColoWyo reclamation & pit picture 2.JPG)(See attached file: ColoWyo reclamation & pit picture 3.JPG)
(See attached file: ColoWyo reclamation .JPG)(See attached file: Trapper reclaimed 5.JPG)(See attached file: Trapper reclaimed 8.JPG)(See attached file: Trapper reclamation 2.JPG)(See attached file: Trapper reclamation 4.JPG)
(See attached file: Trapper reclamation 5.JPG)

* They said the bobcat crosses through the maintenance yard in the morning and sleeps in the empty cable reels during the day.

[This will have to be sent in several e-mails because of size restrictions.]
